PROFILE

As a seasoned Frontend Software Developer with over 3 years of hands-on experience in mobile and web development, I specialize in creating sleek, responsive websites and meticulously crafted mobile applications. My deep expertise in frontend technologies is complemented by a keen eye for detail and a passion for modern design. I excel at transforming complex problems into innovative, efficient solutions, always aiming to enhance user experience and streamline processes. Ready to leverage my skills in a dynamic mobile development role, I am committed to delivering top-tier digital products that meet and exceed user expectations.

PROFESSIONAL EXPERIENCE

React Native Developer, *Aspacelife Technology*   03/2023 – present   Abuja, Nigeria

- Developed a mobile application that enables users to interact socially, do transactions, and communicate.
- Enabled users to post text, objects, and media.
- Implemented functionalities for liking, commenting, and reposting posts.
- Created chat functionality for direct messaging between users.
- Integrated voice and video calling capabilities.
- Added features for forwarding, deleting, replying, and copying chats.
- Implemented online user tracking.
- Facilitated peer-to-peer payments.
- Enabled users to scan QR codes for payments.
- Integrated utility payments (e.g., electricity, data subscriptions, DSTV, and telecommunications).
- Developed features for following and adding friends.
- Enabled users to see feeds from those they follow.
- Enhanced profile functionalities to support a robust social networking experience.
- Collaborated closely with the backend engineers to deliver a mobile application that was completely optimized.

Frontend Engineer, *Sendme food technologies*   10/2022 – 03/2023   Ibadan, Nigeria

- Throughout my tenure at the organization, NextJs and TypeScript were used to develop all software applications.
- Built a software that generate $500,000,000 revenue for the company within my first 2 months in the company.
- Assembled and maintained the React applications that enables entrepreneurs to place and manage orders specifically for their firm while allowing the business to keep track of customers' orders.
- TanStack react query was used to handle and manage API integrations.
- Developed a portion of the frontend for an online consumer ordering service that recommends customers which plan to subscribe to based on their available balance.
- The entire React applications was built using the MVC (Model View Controller) design paradigm.

React Native Developer, *Leverpay(contract)*   01/2023 – 03/2024

Lagos, Nigeria

- Developed a fully functional mobile application that allows users to conduct business with merchants or another normal user.
- This application fills the currency gap between the dollar and the naira, simplifying transactions for our users whether they are doing business abroad or in Nigeria.
- Delivered a fully optimized mobile application by collaborating closely with the product managers and backend engineers.

React Native Developer, *Jivaso Technologies(contract)*   05/2022 – 01/2023

Remote, Nigeria

- Built and maintained React Native applications for an online accessory store that leverages the Google Maps API to suggest stores to consumers depending on their location.
- MVC architecture pattern was used to develop all mobile applications built for the company.

Frontend Developer, *Linuxjobber,inc(contract)*   08/2022 – 08/2023

- Developed and maintained React applications, from landing pages to fully functioning web applications.
